**NOTES REGARDING OLD FORM:**

In the old form, Worksheet S-3, Part I, Lines 6-10 were cost center coded. When extracting data for these lines you would not actually extract these line numbers but extract the codes which became the line numbers in the old files. For example, when extracting data for ICU (which is on Line 6), you would extract lines 02600 through 02619.

**NOTES REGARDING NEW FORM:**

In the new form, you extract the actual line numbers for Lines 8 through 12. These are not cost center coded in the 2552-10 data files.

**NOTES REGARDING OLD FORM:**

In the old form, Worksheet G-2, Lines 10 through 14, Column 1 were cost center coded. When extracting data you would not actually extract these line numbers but extract the codes which became the line numbers in the data files. For example, when extracting data for ICU (which is on Line 10), you would extract lines 02600 through 02699. This is the case for Column 1 only. For Column 2, Line 26 is actually Line 26 on the form (operating expenses). HCRIS only collected cost center coded intensive care and other special intensive care data in Column 1.

**NOTES REGARDING NEW FORM:**

In the new form, you extract the actual line numbers for Lines 11 through 15. These are not cost center coded. HCRIS only collected cost center coded intensive care and other special intensive care data in Column 1. These are not cost center coded in the 2552-10 data files.

**NOTES REGARDING OLD FORM:**

In the old form, Worksheet D-6, Lines 37 through 41 were cost center coded. When extracting data for these lines you would not actually extract these line numbers but extract the codes which became the line numbers in the old files. For example, when extracting data for ICU (which is on Line 37), you would extract lines 02600 through 02619.

**NOTES REGARDING NEW FORM:**

In the new form, you extract the actual line numbers for Lines 43 through 47. These are not cost center coded in the 2552-10 data files.
